Solid deal:

- if you're really into the game and/or
- until the time comes when they nerf Nogardnit.

If you're just a casual player then pass, save up your rubies and buy auto clickers that way. I've spent way too much time and absolutely no money on this game so far, so I don't mind paying for one auto clicker. Plus this DLC doesn't affect the ruby cost increase that comes each time you buy an auto clicker in-game. Win-win.. amazing game! love the goodies and shop items! weekly rewards! this game is about your strategy, not rng. buy it now! just bought all the dlc to support the devs! hoping for awesome content to keep flowing in!. Simple fun game, wish it had a bit more depth and a bit more movement options (ability to jump).

If you like classic style beat em up games, this has the basic formula down.. A game where you can walk around with no pants, get insta-killed by a girl and her father because you told her she's ugly, and have a full conversation with an animal in your head.

And to think this is only the beginning.

10/10. Same shiit as Manhunter.. Been looking for a game like this... Fun indie rpg that's definitely not as easy as it seems at first.

Clean graphics style & creatures that are punishingly fast. Already died a good few times but that's just solidified my resolve to beat it.

Finally realized i could press I to pause the fighting & heal myself which has helped me move forward. The grind is real... but quick & straightforward.. Awesome Kart Racer which embodies the look and feel of Crash Team Racing while managing to maintain it's own personality. Hard to believe that this game has been developed by one person, and I look forward to seeing what he does with the final release.. I see a lot of people comparing this with Rogue Legacy. If you're looking for a bigger challenge and longer game, go there. This is a lot of fun, and was surprisingly short... I sat down to play just this morning and made it through without trouble in under an hour as a Warrior. So of you want that little sense of accomplishment from "beating a game" and having a little fun, this does it. The bosses are fairly easy when you notice their patterns, and the game has a total of 8 stages. Each "level" has 2 parts to it, and the second has the boss fight.

I don't know why "Princess" is in the title presently, as I rescued the King, but...hey. It's a game, and I would say, "Try this out, buddy." Maybe not pay about \$5 for it, but it Does have a lot of replay value still.

PS: The game music is a blast!. This is a fairly simple "collection of puzzles" game. It is fantastic. There are hundreds of puzzles. There are different types of puzzles. There are Steam Achievements. If you like puzzles, buy this. This game is great. I have to go play puzzles now.

Interestin game, a bit of tank warfare to play soccer with obstacles. Not quite worth 10 bucks but for a couple of bucks give it a shot it's not that bad surprisingly enough.. I don't see how you solve the puzzle with zombies attacking you, but this game has a fun challenge to it. A beautifully challenging set of puzzles. I especially like the graded scoring system. If you just want to spend a few minutes, you can look at the hint and complete the puzzle fairly quickly. More challenging is to get the gold bonus (usually a different method to the hint so you can work it out for yourself). Finally, for the ultimate challenge, try to beat or equal the online rating, which really tests your knowledge of the subtle nuances of the game, especially since the original game has been around for a year on a different platform than the PC version which was my first encounter with Terraform, so people have had time to come up with good ideas for high-scoring solutions. Some planets are so well designed, they have a great number of different solution methods, with some red herrings (like tools you don't need which mislead you and some obvious methods suggested by terrain which end up failing for a subtle reason). Okay, not EVERY planet is a work of art (some of the planets introducing asteroids are a bit perfunctory in comparison to the great depth of most levels) but a pretty large number are. I have not managed (yet!) to equal the online rating on quite a few of the puzzles, but any time I equal or beat it gives a real glow of satisfaction. Lateral thinking is needed for some of the best scores, and you need to keep an open mind and avoid making too many assumptions, so it's a real brain workout.

The only quibble I have is that the online ratings don't seem to be completely stable (the game allows me to upload a lower online rating than the original sometimes, which I now try to avoid doing) but hopefully that will be fixed soon.. Epic Store sell outs.. Nice lake, grabbed it while on sale -25% even though the devs have a rocky past, i think they have put a fair amount of work into the game so far which helped my decision to buy the DLC.. I once visited Kykuit, the estate of the Rockefeller family—possibly the wealthiest family in human history. I thought it was so cool that they had a multi-story art museum in their house.

Now I have a multi-story art museum in my house. And so can you, for the very reasonable price of FREE.

Virtual reality is ♥♥♥♥ing awesome.
